

# Handrail luminaires OHR 1 and OHR 2

powered by **Elements**

**IL**  
InstaLighting

The OHR handrail lighting solution not only increases safety and orientation in public places – it is also an architecturally versatile design tool. The flexible use of light colors allows accent and area lighting to be matched to the surroundings, with the luminaire itself disappearing invisibly into the handrail. The standardized profile made of particularly durable V4A stainless steel can be effortlessly integrated into all commercially available handrail systems – regardless of materials and dimensions.

The new Elements lighting platform guarantees the highest lighting quality and freedom from glare. Thanks to a simple plug-in system, even long distances can be supplied with just one power feed.

# Elements – Modular Light Kit

## Shape your Light

IP67  
IP69  
IP69+

### Sealing offers maximum protection

Plastic sealing of the LED lighting elements ensures a longer service life, improved light quality, protection against vandalism and against external influences such as moisture and heat.

### Micro-reflectors

Maximum light control in minimum space directs the light exactly where it's needed.

### Easy mounting

thanks to plug-in connections (IP67) and through-wiring

### Compatible with models from all manufacturers

The standard grooved tube allows the OHR handrail light inserts to be installed in models of all manufacturers and different materials

### Protection against corrosion

The use of V4A stainless steel protects the OHR from corrosion and environmental influences.

Elements is the modular technology platform from InstaLighting for maximum demands on lighting quality and flexible planning. A modular system of optics, lamps and control management solutions allows you to configure bespoke high-quality lighting scenarios for every conceivable application.

**Modular building block system**  
Freely combinable system of light distributions, light colors and control management modules

**Maximum and uniform light quality**  
Consistent light quality across the entire portfolio for all optics, power classes and light colors.

**Flicker-free dimming**  
across the entire spectrum from 1 to 100%

**Stable temperature management**  
for ambient temperatures from -20° to +35°C

# Optics and light effects

# Variants

---

## Light insert OHR2

Direct light in different beam angles (Reflector optic)  
(symmetrical, asymmetrical)  
Clear PU encapsulation  
Protection class IP67, IP69, IP69+

---

## Light insert OHR1 4020

Direct light in different beam angles  
(symmetrical, asymmetrical)  
Clear PU encapsulation  
Protection class IP 67, IP69, IP69+

---

## Light insert OHR1 4020

Diffuse light with Lambertian radiation characteristic  
without visible LED points  
Diffuse PU encapsulation  
Protection class IP 67, IP69, IP69+

---

# Accessories

---

## Groove locking profile

The groove locking profile is used for positive locking of the profile groove and to protect the electrical cables in areas where there is no LED insert.

# Certification

## Products for Deutsche Bahn and Infrastructure

As a certified supplier to Deutsche Bahn, InstaLighting has special know-how in the development of lighting solutions for transport infrastructure. In particular the handrail luminaire OHR1 meets these high standards for safety, easy maintenance and robustness.

# Wiring

The combination of 48V system voltage and intelligent conversion on the LED boards allows cable lengths of up to max. 100m and offers flexible planning of the electrical installation/positioning of the control cabinets/etc.

# Complete solutions including handrail

We are also happy to offer you complete solutions for your project including handrail.

With our freely configurable modular handrail system, illuminated handrails for all conceivable materials, dimensions and architectural situations can be configured quickly and easily. Contact us or download our handrail catalog here:

## Variants and measurements (mm)

### Light insert/cross-section

### Handrail variants (examples)

### Light insert length

length luminaire / length light outlet

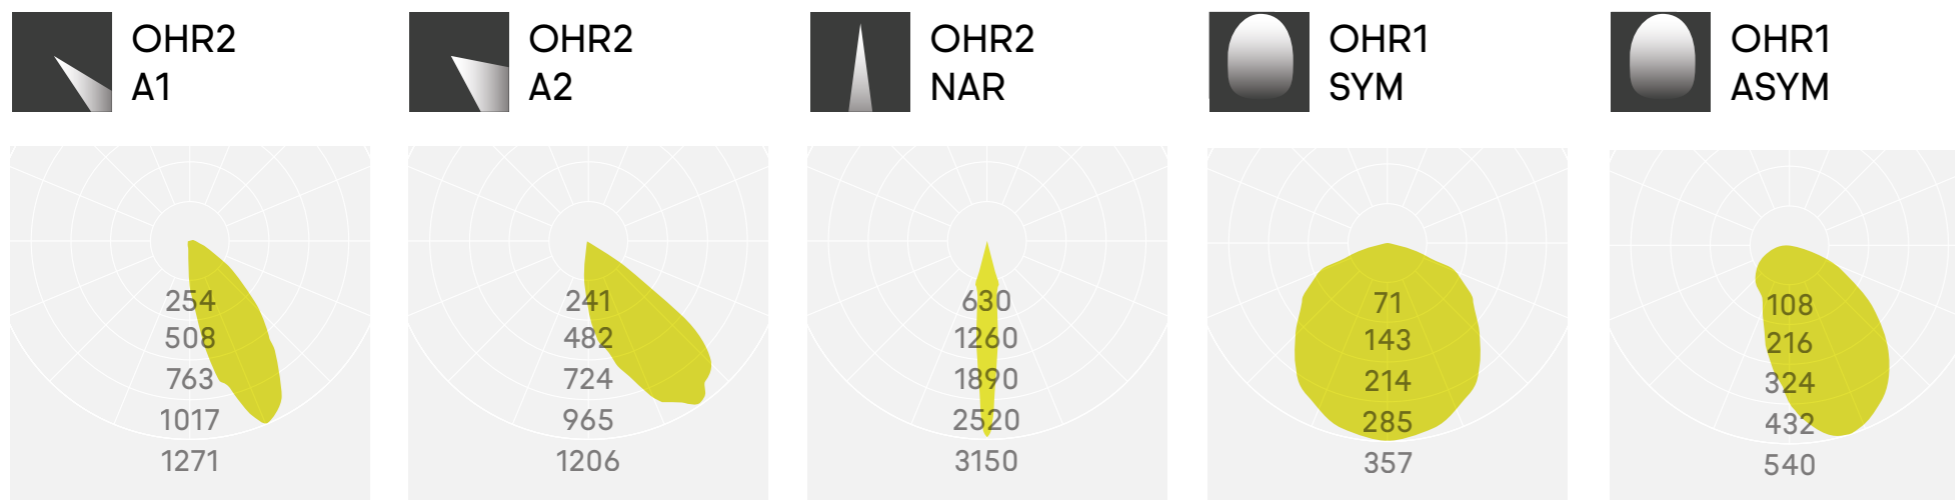

## Light colors

Several light colors can be combined in a single luminaire

## Optics and light distributions

Several light distribution curves can be combined in a single luminaire

## Rated lumens (lm)

	Level 1	Level 2
OHR2, 48V, 1035mm, 3000K, A1	410 lm	1050 lm
OHR2, 48V, 1035mm, 3000K, A2	500 lm	1300 lm
OHR2, 48V, 1035mm, 3000K, NAR	410 lm	1050 lm
OHR1, 48V, 1035mm, 3000K, clear sealing	590 lm	1410 lm
OHR1, 48V, 1035mm, 3000K, diffuse sealing	280 lm	680 lm
OHR1 230V, 1035mm, 3000K, clear sealing	-	700 lm
OHR1 230V, 1035mm, 3000K, asymmetrisch	-	700 lm

→ 48V LED modules also available in Tunable White and RGB versions.

# Technical data

<b>Light distribution</b>	SELV	Asymmetric 1
		Asymmetric 2
		Narrow
		Symmetric
	230V	Symmetric
		Asymmetric
<b>Rated voltage</b>	AC 230 V / DC 48 V	
<b>Protection type</b>	IP67, IP69, IP69+	
<b>Protection class</b>	II, III	
<b>Color rendition</b>	Ra 92	

<b>Ambient temperature</b>	-20 ... +50°C
<b>Storage/transport temperature</b>	-25 ... +70 °C
<b>Life span</b>	(L80/B10) (@ 25 °C) 60.000 h
<b>Dimmable/controllable</b>	yes, flicker-free
<b>Housing material</b>	stainless steel V4A
<b>Sealing material</b>	PV sealing, clear
<b>Glow wire test</b>	650 °C
<b>Impact resistance housing</b>	IK10
<b>Certification</b>	Deutsche Bahn
