**New Products 2024**

Metaspace is a new pole-top luminaire series with innovative light sources and optics. It is designed to meet high demands for sustainable illumination. Excellent glare control is achieved by indirect reflectors with LEDs which are completely shielded from view. These precise optics direct light solely onto the target area – the ground. Stray light into the sky is avoided. By using tuneable warm white colour temperatures, the orientation behaviour of insects remains undisturbed.

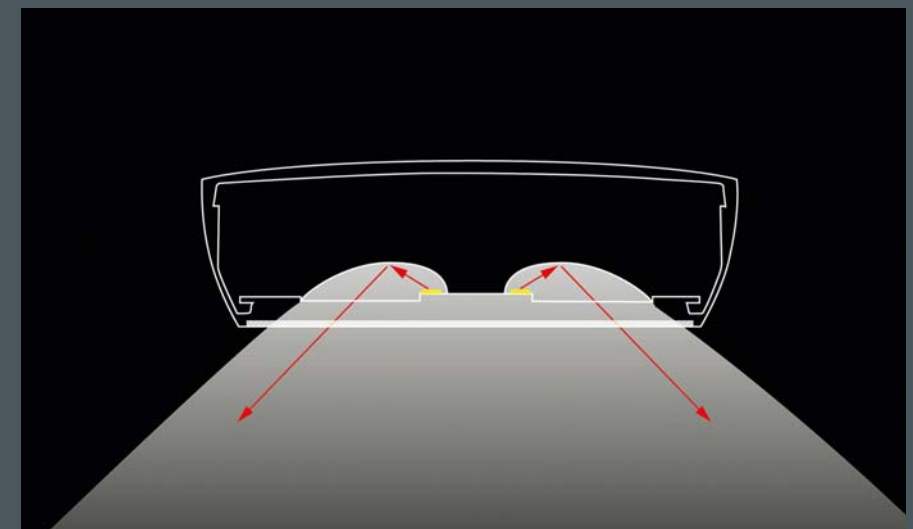

With dark sky compliant optics and perfect glare control Metaspace delivers the best light quality for humans and nocturnal animals.

With their exemplary design the luminaires are ideal for use in urban or landscaped architecture.

The light of LED modules, which are completely shielded from view, is projected onto an indirect reflector and redirected on the target area. This optic achieves excellent glare control.

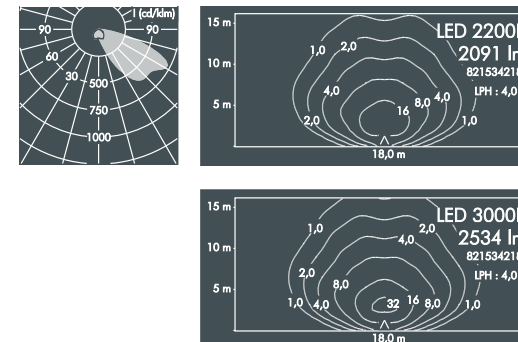

**Metaspace**

With highly efficient LED modules, integral temperature monitoring device, CRI: > 80, Colour tolerance: max. 3 SDCM  
 Service life: L80/B20 > 50 000 h  
 protection class I, IP65  $\blacklozenge$   $\blacktriangle$   $\blacktriangle$ , IK08  
 windage area AW 0.056 m<sup>2</sup>  
 corrosion-resistant die cast aluminium housing AlSi12, polyester powder coated, highly efficient metallised PC reflector, all exterior steel parts are stainless steel, tempered safety glass, silicon gasket, 5 stainless steel screws, pole top fitter for poles  $\varnothing$  60/76 mm, 4 M8 grub screws, M20 cable gland, with 8 m cable H07RN-F3G1, integral driver (AC/DC)

The luminaires can be equipped with a Zhaga-18 interface for communication and sensing on the top and at the bottom.

**Metaspace Adjustable White**

With the Adjustable White light control it is possible to adapt colour temperatures for sustainable exterior lighting applications.

As the night progresses, colour temperatures can be adapted to the needs of sustainable illumination throughout the seasons. Operating luminaires at approximately 3000 Kelvin is efficient and recommended during busy hours.

Later in the evening the requirement for high energy efficiency gradually becomes less important. The luminaires are switched to operate with warm white colour temperatures of about 2700 Kelvin. The light quality becomes more inviting and insects are attracted less.

During late hours, while few people stay outside, the protection of the night environment takes precedence. By operating luminaires with approximately 2700 Kelvin the orientation behavior of insects and nocturnal animals is disturbed only minimally.

The new floodlight series Metaspot combines exemplary design with innovative optics. The elliptical shape of the luminaires harmonizes especially well with landscape architecture. The new Darkring optics are a breakthrough development for effective glare control. For Metaspot a pole-top fitter with an integral Zhaga-18 interface is available as an accessory. By the use of an antenna, up to 4 luminaires on one pole can be controlled and monitored individually. In addition to pole luminaires, there are versions for surface mounting.

Metaspot pole luminaires with various sizes and optics can be combined for imaginative lighting of exterior spaces. The floodlights are equipped with a turn-and-tilt fixing system for flexible orientation. Possible applications range from uniform illumination of paths and public areas to highlighting of objects. A gobo projector version completes the series.

With the innovative Darkring optic light from a circular LED board is projected onto the target area via an indirect reflector. The light source is shielded from view and excellent glare control is achieved.

**Metaspot 3 with mounting bracket**  
 With high performance LED module (Zhaga), integral temperature monitoring device, CRI: > 80, Colour tolerance: 3 SDCM  
 Service life: L80/B10 > 50 000 h  
 protection class I or II, IP65  $\blacklozenge\blacklozenge\blacklozenge$ , IK08  
 windage area AW 0.052 m<sup>2</sup>  
 corrosion-resistant die cast aluminium housing AlSi12, polyester powder coated,  
 highly efficient aluminium reflector or lens made of optical silicon (Street Optic), all exterior steel parts are stainless steel, tempered safety glass, silicon gasket, toolless twist lock for closure,  
 mounting bracket: 2 drilled holes  $\varnothing$  9 mm, spacing 40 mm, 1 centre hole  $\varnothing$  14 mm, tilt range 180°, M20 cable gland, integral driver (AC/DC)

Custom made gobos can be produced from image data in one of the following file formats:  
**EPS** (min. 300 dpi), **TIF** (min. 300 dpi), **JPG** (in low compression). Max. image size D on gobo: D = 38 mm  
 \* **Dichroic colour filter** (yellow, red, blue, green) are available upon request.

Minispot are cylindrical floodlights with very compact dimensions. With their minimalist design these luminaires are ideal for discrete installation on façades and for use in landscape lighting. Dimmable versions for 48 Volt power supply are available as well as luminaires that can be connected to 230 Volt directly. In addition, there are CASAMBI® ready versions with monochrome or RGBW LEDs that can be controlled with an app. With their wide choice of optics and wattages Minispot floodlights are versatile tools for accent lighting in exterior spaces.

Minispot floodlights are available as versions with RGBW LEDs. Light colours can be set easily via the CASAMBI®-App without using any complicated DMX control system.

Narrow beam light distributions with reduced stray light are used for accent lighting on façades and for objects.

The slanted front of the luminaire serves as a glare shield. For improved maintenance rain and dirt can flow unimpeded over the flush lens.

### Minispot 1

With high performance LED module, CRI: > 80, Colour tolerance: max. 2 SDCM  
 Service life: L90/B10 > 50 000 h  
 protection class III ⚡, IP65 ⚡, IK08  
 windage area AWW 0,006 m<sup>2</sup>, corrosion-resistant die cast aluminium housing AlSi12, polyester powder coated, with precise PMMA optic, all exterior steel parts are stainless steel, tempered safety glass, silicon gasket, 2 stainless steel screws, mounting bracket: 1 elongated hole Ø 7 mm, spacing 12 mm, 1 centre hole Ø 8,5 mm, tilt range 185°, M16 cable gland, 48 V DC: integral constant current control

### Minispot 2

With high performance LED module, CRI: > 80, Colour tolerance: max. 2 SDCM  
 Service life: L90/B10 > 50 000 h  
 protection class I or III ⚡, IP65 ⚡, IK08  
 windage area AWW 0,01 m<sup>2</sup>, corrosion-resistant die cast aluminium housing AlSi12, polyester powder coated, with reflector or precise PMMA optic, all exterior steel parts are stainless steel, tempered safety glass, silicon gasket, 2 stainless steel screws, mounting bracket: 1 elongated hole Ø 7 mm, spacing 18 mm, 1 centre hole Ø 8,5 mm, tilt range 200°, M20 cable gland, 48 V DC: integral constant current control, 230 V AC: integral driver

#### Minispot 1, narrow beam (48 V DC, dimmable DALI)
